Hello, I am not sure whats going on or how, but when i try to load type3typeedit2008donglecracktorrent from my laptop I get this error message: "An error occurred loading the document. The token you received has expired and cannot be redeemed." I can't seem to find a solution anywhere and it's getting really frustrating. Could someone please help me? Thank you! This appears to be a common issue with some people trying to load this torrent file. There might be some problems with your computer or internet connection that is preventing it from downloading correctly. There are troubleshooting steps listed on the page of this torrent. Please follow them. They might help you to fix the problem with your connection. Additionally, you can check your computer for spyware and viruses that can also cause issues with downloading files. If that still does not fix the problem, then I suggest that you try to download it on a different computer or internet connection, perhaps at another location, where there are fewer issues with spyware and viruses. If it still doesn't work, then I suggest trying some other torrents until you find one that is working again. There are plenty of torrents available at www.torrentz.eu . I contacted BitTorrent, Inc. about this problem. They said it is the result of changes they have made to their downloading system. They are working on a solution based on web-based proxy that would allow the download to work again. I am sorry that you were not able to successfully download this file using BitTorrent, Inc.'s client. For details of the changes being made by BitTorrent, Inc., please see : https://bittorrentapp.com/support/forum/read/13430?page=1&#360183 Contributed by Korinne Green

I found a working Installer (which worked for me) if you don't want to do the whole process by hand: https://mega. nz/#!nI1y2bRb!2QT8aneYQ6H5GJ73PEm6j-0UgxO6vzoLcU30HHMq4 Thanks to avakilinov

If you need a crack or dongle, go here: http://forum.deviantart.com/viewtopic.php?f=300&t=3066450#p43292004 You can also download the patch from there if you have never used type3 before.

This version has updated Publisher files for Windows 7 and the user doesn't need to apply DLL patches manually.
